

EUROPEAN NEWS.

The steamship China, from Liverpool on the 24th of October, has the following intelligence:

The London Times, of the 21st, contains a Rio Janeiro letter dated September 24, and which is as follows: "On the 13th of September, at 4 P. M., the British bark Gracie, formerly the American bark Fanny Crenshaw, was towed out in ballast, bound for Liverpool. At 5½ o'clock P. M. the Gracie saw in the distance the Federal steamer Mohican, and, fearing hostilities on the part of the latter, the master ordered the towboat to return, and anchored his vessel near Fort Villegignan, under the protection of the fleet and her Majesty's ship Edgmont. It is reported that the American Minister has given orders to the captain of the Mohican to fire on the Gracie, the Lottie, (formerly the American bark Abigail,) the Virginia, and the Ann E. Grant, should they leave port, and as soon as they get outside, on the plea that they are Southern property, and it is supposed the Mohican is now cruising about with that object. It is stated, however, that the Brazilian Government has withdrawn the clearance papers of these vessels, and therefore they will not be able to leave port."

The London Times publishes a letter, commenting upon the importance of the seizure of the steam rams in the Mersey, and expressing the belief that the people will stand by the Government in their determination to defeat the contrivances.

Mr. Laird has been speaking at Birkenhead, defending his course in the matter of the Alabama, etc.

Napoleon has received and congratulated the Mexican deputation on their success.

St. Petersburg accounts say it is the general belief that there will be a diplomatic rupture between Russia and the Western Powers before Christmas. There were rumors of a threatening situation of affairs between Russia and Turkey.

The Morning Herald says the capture of the steamer Sir Robert Peel, off the Rio Grande, is exciting considerable attention at Lloyd's, and a pressure will be brought upon the British Government on the subject, it being alleged there was no ground for the seizure.

Rev. Henry Ward Beecher has been presented with an address by the students in the non-conformist colleges, and also entertained at a farewell breakfast in London.

A Paris letter to the Daily News anticipates the semi-official press will immediately receive orders to say that, after all, the Mexican people simply desire annexation to France.

The Polish question is unchanged.

The Liverpool cotton sales for the week were 100,500 bales. The market was buoyant, and ½d higher for American, and ½d higher for other descriptions—closing less firm.

"Dunn Brown," the army correspondent of the Springfield Republican, thus discourses of the use of whiskey in the army:

"An army is a big thing, and it takes a great many eatables and not a few drinkables to carry it along. Have you any idea how many barrels of commissary (that's a gentle euphemism for whiskey) it takes per week to run the machine? I don't know exactly, but I do know that it would be better to Uncle Sam than 100,000 volunteers to his army, if he would shut off entirely and absolutely the supply of intoxicating liquors from officers and men, from surgeons, hospitals and everything and everybody connected with the army."

The monthly table for marine losses for the past month shows an aggregate of thirty vessels. Of the above three were captured and burned: one captured and sunk; one captured, fate unknown; one foundered at sea; three were abandoned at sea; one sunk after collision, and two are missing. The total value of the property lost, destroyed and missing, is estimated at one million and ninety-five thousand three hundred dollars.

SIGESMOND & HAYWARD,
DENTISTS.

NEW AND IMPROVED INVENTION OF
ARTIFICIAL CHEOPLASTIC BONE TEETH
WITHOUT METAL PLATE OR CLASPS.

DR. S. B. SIGESMOND & CO.,

211, King Street, Alexandria, Va., 910 Broadway, New York—200 Pennsylvania avenue, between 12th and 18th streets, Washington.

CALLS the attention of the public to the following advantages of his improved system:

1. The Teeth of their manufacture will never corrode nor change color by any acids, being three-fourths lighter than any other.
2. No teeth or roots need be extracted, as the artificial ones can be inserted over them.
3. The roots will be made inoffensive and never to ache.
4. No temporary teeth are needed, as permanent ones can be made immediately, thereby preserving the natural expression of the face, which under the old system is frequently disfigured.
5. This work has been fully tested over five years by many of the first chemists and physicians of this country.

Dr. S. & Co., have also invented a white undestructive metal filling, with which the most sensitive teeth can be filled without pain, and can build up a perfect sound tooth on any side roots, which will last through lifetime.

The best of references given by Dr. W. Mott; Dr. Doremus, Professor of Chemistry, N. Y., and thousands of others.

Call and examine for yourself.
